

Notice of Commencement

Napanee Generating Station

TransCanada Energy Ltd. (TransCanada) has commenced planning for a 900 megawatt high efficiency combined cycle natural gas-fuelled, electricity generating station. The proposed Napanee Generating Station (NGS) will be located on the existing Ontario Power Generation Lennox Generating Station site in the County of Lennox and Addington approximately 13 kilometres south of the town of Napanee. The facility will provide clean, efficient power to the Province and ensure greater reliability of Ontario's electrical system.

This Notice has been issued to advise the public, Aboriginals, other stakeholders and government agencies of the proposal and the commencement of the environmental assessment process.

The NGS project is subject to the Environmental Screening/Review Process as described in the Ontario Ministry of the Environment's "Guide to Environmental Assessment Requirements for Electricity Projects" (January 2011). The Environmental Screening/Review Process has two possible stages – the Screening stage and the Environmental Review stage. Although only required to prepare a Screening Report, TransCanada has voluntarily chosen to undertake the more comprehensive Environmental Review Report.

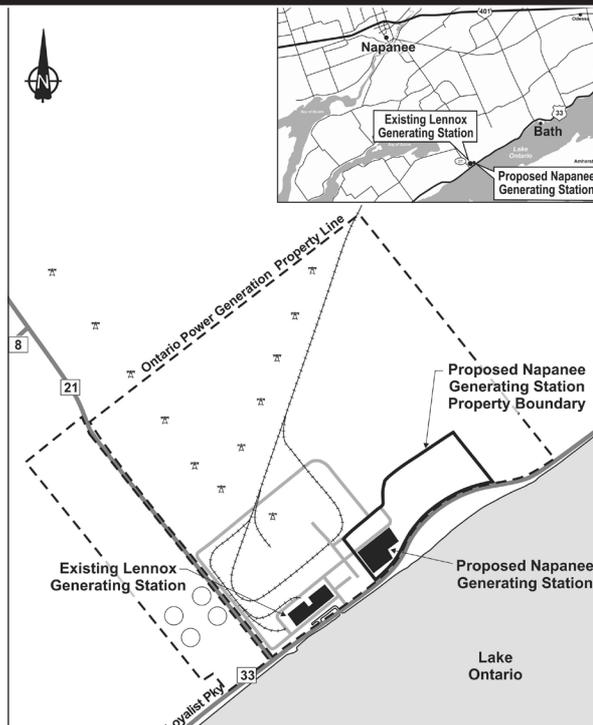

TransCanada is committed to engaging with the public, Aboriginals, and other stakeholder groups throughout the development of the project. TransCanada will seek community input regarding local environmental and socioeconomic conditions, facility design plans, anticipated project benefits, and impact management plans.

Napanee Generating Station Open House #1

Monday, February 11, 2013, 5:00 – 8:30 p.m.
(presentation at 7:00 p.m.)
South Fredericksburgh Hall
2478 County Road 8
Napanee, Ontario

This introductory Open House will provide an opportunity to learn about the proposal by speaking directly with members of the NGS team, to review display panels and maps, and to gather plain language summary information. It will also allow the NGS team to meet members of the community, listen to issues or concerns and gather important feedback on the proposed project which will help us to develop a meaningful and effective engagement process.

The next Open House is anticipated to be held in the Fall of 2013, and will feature the results of our environmental studies.

Anyone who is interested in this project is encouraged to get in touch with us at any time with questions or concerns. If you are not able to attend the introductory Open House or would like further information, please direct your inquiries, comments, or requests for further information regarding this project to:
